- Each Opening has Locking Setscrew
- 1 1/2"-11 1/2" Threaded NPSM (Nat'l Pipe Straight Mechanical)
- All Colors Available

JB-300

JB-400

General Traffic Equipment Corp's Junction Boxes are a must for two-, three- and four-way frameworks that are suspension hung. Large wiring body and removable access plate provide easy installation and rapid snaking, splicing, and wiring of cables. Each threaded opening has a setscrew to lock in the pipe nipples. Eliminate stocking complete upper frameworks with junction boxes. Make up frameworks as you need them!

ALUMINUM JUNCTION BOXES

- NYC Designation "Junction Box" for 2MS, 3MS and 4MS "Spider" Assemblies
- All Hardware Stainless Steel
- Heavy-Wall Construction; Die Cast Aluminum
- Serrated Top Hole for Position Locking (For Clusters)
- Weather-Proof Cover Plate
- 1 1/2"-11 1/2" Threaded NPSM (Nat'l Pipe Straight Mechanical)

We think Lucy may be getting a little too interested in the Junction Boxes!!
