

# POST TOP ASSEMBLIES

## Multi-Way Slipfitters

- For Post top (4 1/2" OD) Mounting of Vehicle or Pedestrian Signals
- Assembly can be Aluminum or Iron/Steel Pipe
- Cast Ribs on Slipfitter Base Resist Cracking and Stress
- Center Pipe Provides Tremendous Stability
- Setscrews are 300-Series Stainless

These Multi-Way Slipfitters are available in two-, three-, and four-way configurations. Easily mounted atop a signal post (4 1/2" OD), and held tightly in place with huge stainless setscrews. A two-way may be ordered today and may be updated to a three- or four-way by simply removing the 5/8" closure cap(s) and screwing in a 3 1/4" nipple and serrated "tee". Shipped complete and ready to install right out of the packing carton. Powder-coated finish will keep your slipfitter assemblies looking new until you retire!

*Lucy says, "This is the PTSA-200 model, but don't think I come with the deal!"*
