

SPAN WIRE CLAMP

SWC-325F - Cast Iron

Cast Iron Construction

- **Cast Ductile Iron Construction; Stronger than Aluminum!**
- **65-45-12 Ductile Iron**
- **"U" Bolts and 5/8" Clevis Pin Available in Stainless or Plated Steel**
- **Job-Designed for Quicker Installation**
- **Hot-Dip Galvanized or Powder-Coated Finish**

Batty says,
"With my new meds this Span Wire Clamp isn't the only thing stronger than aluminum, hehehe!!"

General Traffic Equipment's SWC-325F is a superior strength alternative for cast aluminum clamps and with the addition of hot-dip galvanized finish, will retain corrosion resistance for many years. The SWC-325F will adapt easily to any wire entrance head or balance adjuster. The clamp accommodates up to 5/8" span wire. Standard clevis pin is 5/8" diameter.

| MODEL | DESCRIPTION |
|-------------|---|
| SWC-325F | Span Wire Clamp, Plated Steel "U" Bolts, Clevis Pin; All Other Hardware Stainless |
| SWC-325F-SS | Span Wire Clamp, Stainless Steel for Clevis Pin and All Hardware |
