

Steel Tie Braces

2-, 3-, & 4-Way Spreaders

- Tie Braces Stamped from 11-Gauge Steel Sheet
- Stamped Slots for Serrated Ring
- Eliminates Costly Pipe Brackets used as "Spreaders"
- Resists Distortion & Bending...unlike Aluminum
- Available as an Assembly with Closure Caps, Serrated Rings and Hexnuts, or "Stripped"
- Quality Powder-Coated Finish

Ruffles says,
"All I need is a Signalmaster Wrench and I'll have this puppy installed in a flash!"

General Traffic Equipment Corp's Steel Tie Braces are used to maintain signal alignment and proper spacing on multiple signal arrangements. Used as an alternate to costly pipe bracket lower spreaders, they work quite well and resist bending. Slots are stamped alongside the nipple hole to accept serrated rings. The steel tie braces are powder-coated to give a durable, corrosion-free appearance and long-lasting work life.

Please specify powder-coated finish when ordering.  CUSTOM COLOR
